

The Anavon Global Equity Long Short UCITS Fund, a sub fund of Tages International Funds SICAV is a global long/short equity fund. The Fund's objective is to achieve superior absolute risk-adjusted returns over the long term. The strategy is biased towards developed markets and analysable sectors with a focus on liquid, large or mid cap stocks. Anavon employs deep fundamental research to seek out individual long and short opportunities while leveraging the manager's experience across the capital structure. The long portfolio targets high quality businesses with secular growth and competitive advantage where the share price is highly dislocated. The short portfolio seeks to position low quality businesses with structural challenges where the share price is overhyped. The strategy is designed to protect capital during downturns and capture equity market upside during upturns with a strong focus on risk management.

Monthly Commentary

The Anavon Global Long/Short strategy returned -1.5% net in August versus +0.6% for the global equity average (MSCI ACWI). It was yet another month of significant divergence amongst global equity markets, with the US (\$S&P500 up 3%) significantly outperforming the European averages (Stoxx600 down 2.4%). Whilst over the long term our geographic exposure weighting is not a significant factor affecting performance, in the very short term it may contribute positively or negatively. August turned out to be such a month where our relative overweight European long exposure penalised us and, equally, our relative overweight US short exposure turned out to be a drag. We believe these monthly movements are temporary in nature and even out over time. Idiosyncratic bottom-up alpha generation will continue to be the driving force contributing to our performance. The long investments detracted c. 1% from gross performance. The largest contributors were **Allergan** and **Discovery Communications** with both stocks up c. 4% in the month of August. The largest detractor was **Jackpotjoy**, having fallen nearly 20% since the company released its semi-annual results. The short investments detracted 0.8% from gross performance in August, which is marginally more than what a market index of equal size would have cost us. The largest contributor was **Viasat**. Shares in **Viasat** dropped 17% on August 10th on the back of a very disappointing set of earnings.
