

The Anavon Global Equity Long Short UCITS Fund, a sub fund of Tages International Funds SICAV is a global long/short equity fund. The Fund's objective is to achieve superior absolute risk-adjusted returns over the long term. The strategy is biased towards developed markets and analysable sectors with a focus on liquid, large or mid cap stocks. Anavon employs deep fundamental research to seek out individual long and short opportunities while leveraging the manager's experience across the capital structure. The long portfolio targets high quality businesses with secular growth and competitive advantage where the share price is highly dislocated. The short portfolio seeks to position low quality businesses with structural challenges where the share price is overhyped. The strategy is designed to protect capital during downturns and capture equity market upside during upturns with a strong focus on risk management.

Monthly Commentary

The Anavon Global Long/Short Fund returned +3.3% net of fees in August, in what was another positive month for global equity markets. Strong performance from our long investments was partially offset by a weak short book.

The Fund's long investments contributed c.7.3% to gross performance significantly outperforming the global average. Our performance was primarily driven by favourable idiosyncratic moves from stocks where fundamental developments corroborating our bullish stance propelled the stocks higher, rather than general market tailwinds.

The largest contributor this month was **Gamesys** which surged 25% in August following solid results and the initiation of a maiden dividend, which was a core tenet of our long-term investment thesis. Similarly, **Plus500** returned 28% this month after reporting another outstanding quarter.

The Fund's short investments detracted c.3.9% from performance, faring worse than an index hedge of identical size.

The largest single name short loser in August was **Dycom**, with its shares rising 44% in the month. The company reported earnings that beat consensus estimates but were materially supported by aggressive accounting which will, in our view, pressure earnings going forward. We, therefore, remain short Dycom shares.
