(sub fund of Tages International Funds ICAV)

SELWOOD
 ASSET MANAGEMENT

Monthly Factsheet June 2022

FIRM DESCRIPTION

Selwood Asset Management LLP ("Selwood") is a London based FCA authorized independent asset manager that was established in 2015 by Sofiane Gharred. Selwood manages over \$1.8 billion assets, with a focus on delivering consistent returns through a variety of hedged and trading focused equity and credit strategies.

INVESTMENT OBJECTIVE & STRATEGY DESCRIPTION

Selwood Asset Management LLP launched an equity European-focused fund with low net exposure, namely the Selwood Equity Absolute Return UCITS Fund ("Fund") on the Investcorp-Tages UCITS platform in April 2022. The investment objective of the Fund is to seek to achieve long term capital growth by investing or seeking exposure primarily to European companies.

The Fund seeks to achieve the investment objective by investing on a long and/or short basis in equities and equity-related securities, either directly or indirectly through the use of FDI. The equities and equity-related securities in which the Fund may take exposure to include common shares, preference shares and depositary receipts. The Fund will primarily invest in companies with a market capitalization of greater than USD 1 billion, including (without limitation) mid capitalization companies (USD 2-10 billion) and some large capitalization companies (greater and USD 10 billion).

Please refer to the latest prospectus and the relevant key investor information document(s) of the Fund ("KIID") for more information. Please contact IR-EU@Investcorp.com for Fund documents.

Source: Northern Trust, Founder Class USD (SEARUFU ID) net of fees, as of month end. *Class launched 05 April 2022. Please note we are unable to provide extensive historical performance for the Fund as the track record is less than 12 months. Past performance is not indicative, nor a guarantee, of future returns. The value of the investment may go down as well as up. Returns could be reduced, or losses incurred, due to currency fluctuations. Investment in the Fund represents a risk of loss in capital. Please refer to the latest prospectus and the relevant key investor information document(s) of the Fund ("KIID") for more information. Please contact IR-EU@Investcorp.com for Fund documents.

RISK & REWARD PROFILE

Risk Scale from the key investor information document(s) of the Fund ("KIID"). Risk 1 does not mean a risk-free investment. This indicator may change over time. Please refer to the risk glossary at the back of this document.

COMMENTARY

There was nowhere to hide in June, with European markets down 8-10% across the board. The best performing sectors were all defensive ones; food and beverage down only 1.5%, healthcare 1.6% and telecoms 3%. Basic resources were the worst performing sector down 18.5% followed by real estate 15%, and autos 14%.

The Selwood equity long short fund finished down 0.81% with significant alpha and outperformance on the short book offset by a number of long positions. These longs, in our opinion, have been overly penalised by the combination of outflows in Europe (19 weeks and counting), concerns over Russian gas supply into Europe, recession risks, and Central banks actions. One observation of late is that it has become evident that short term price action seems almost entirely driven by these factors and thematic trading, as opposed to stock picking, which is bound to change as we get close to idiosyncratic catalysts.

80% of our top performers from an alpha standpoint came from short positions. There was one stand out name in particular where we benefited tremendously from trading around that core short idea when the company announced a capital increase at a fairly significant discount. We used that primary placing to cover our position before reinitiating it at much higher levels.

The long book has been more challenging in June, largely explained by the comments above. But with very significant catalysts looming in the coming months and quarters, we believe that there are some incredibly attractive opportunities out there. Our plan is to gradually increase our exposure to these names in the coming weeks, as we get nearer to those identified catalysts.

RISK GLOSSARY

Credit and Counterparty Risk: The Sub-Fund will be exposed to a credit risk in relation to the counterparties with whom it transacts or places margin or collateral in respect of transactions in derivatives. To the extent that a counterparty defaults on its obligations and the Sub-Fund is delayed or prevented from exercising its rights with respect to the investments in its portfolio, it may experience a decline in the value of its position, lose income and incur costs associated with asserting its rights. Regardless of the measures the Sub-Fund may implement to reduce counterparty credit risk, however, there can be no assurance that a counterparty will not default or that the Sub-Fund will not sustain losses on the transactions as a result.

Derivatives and Leverage Risk: Leverage arises from entering into derivatives, the terms of which can have the effect of magnifying an outcome, meaning the profits and losses from an investment can be greater than if the investment is made directly into the underlying securities.

Short Selling Risk: The Sub-Fund may create synthetic short positions through the use of derivatives. Short positions behave differently to long positions; for example, the Sub-Fund can come under pressure to close out short positions at short notice and before an offsetting long position can mature. This can create unexpected losses from positions that might otherwise have been seen as low risk or well hedged.

Lack of Prior Track Record: Selwood Asset Management, as the sub-investment manager of the Sub-Fund, does not have pre-existing track record in the strategy pursued by the Sub-Fund.

For a more detailed explanation of risks, please refer to the "Special Considerations and Risk Factors" section of the prospectus and supplement.
