

Tages Paladin UCITS Fund

(sub fund of Tages International Funds ICAV)

INVESTCORP-TAGES

July 2022

FIRM DESCRIPTION

Investcorp-Tages is a global multi-manager investment firm that was launched in May 2020 through a 50/50 joint venture between Investcorp and Tages Group. With offices based in London, New York and Milan, Investcorp-Tages focuses on providing bespoke solutions and manages alternative assets for institutional investors worldwide. Their product range includes multi-manager portfolios across hedge fund strategies, private debt and impact investments, seeding and acceleration partnerships, thematic special opportunity portfolios, risk-premia and cross-asset strategies, and alternative UCITS.

STRATEGY DESCRIPTION & INVESTMENT OBJECTIVE

The strategy aims to provide investors with protection from sharp dislocations in global equity and bond markets without the typical burden of carry associated with tail hedge strategies. The strategy uses a combination of systematic long volatility, convexity, momentum and mean reversion strategies together with low beta carry strategies designed to compensate for time decay. The PM uses a proprietary combination of quantitative and qualitative techniques to evaluate and select a portfolio of investable trading strategies with clear tail hedge characteristics.

The investment objective of the Fund is to provide consistent long-term capital appreciation. Please refer to the latest prospectus and the relevant key investor information document(s) of the Fund ("KIID") for more information. Documents can be found at www.investcorp-tages.com.

PERFORMANCE SUMMARY¹

	June	YTD	ITD
Tages Paladin UCITS Fund (Class B USD) [TACPAUB ID Equity]	-2.13%	-0.99%	1.51%

COMMENTARY

A very strong equity market in July pushed VIX down to 21.33, more than 7% lower. Interest rates markets had their own strong rally as well with the US 10-year yields down 36 basis points, while their European counterparts saw their yields drop by 52 basis points in July. This was an unwelcome combination for hedging and defensive strategies in general. The Tages Paladin UCITS Fund was down -2.13% for the month, bringing YTD performance to -0.99%.

Our hedging strategies cost us -1.45%, low beta strategies detracted -0.51%, whereas tactical strategies were almost flat. Equities were responsible for most of the losses at -1.44% for the month.

We are running 1 time leverage with total exposure at 198% of NAV.

RISK GLOSSARY

Credit and Counterparty Risk: A counterparty may fail in paying the proceeds of sale for assets sold by the Sub-Fund or may fail in delivering securities purchased by the Sub-Fund. The Sub-Fund may also incur the risk that a counterparty may fail to settle a transaction in accordance with its terms and conditions because the contract is not legally enforceable or because it does not accurately reflect the intention of the parties or because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Sub-Fund to suffer a loss.

Derivatives and Leverage Risk: The Sub-Fund may use derivatives as a means of gaining indirect exposure to a specific asset or as part of a strategy designed to reduce exposure to other risks, such as interest rate or currency risk. Whilst this is intended to help the Sub-Fund to manage risk or to take investment positions more efficiently or effectively than could be done otherwise, derivatives can involve the use of debt to finance the purchase of assets (leverage) and the risk of higher volatility, especially if some of the expected offsetting positions between long and short investments do not work as expected, and the Sub-Fund may be exposed to additional risks and costs as a result.

Short Selling Risk: The Sub-Fund may create synthetic short positions through the use of derivatives. Short positions behave differently to long positions; for example, the Sub-Fund can come under pressure to close out short positions at short notice and before an offsetting long position can mature. This can create unexpected losses from positions that might otherwise have been seen as low risk or well hedged.

For a more detailed explanation of risks, please refer to the "Special Considerations and Risk Factors" section of the prospectus.
